

Annas Surdyanto

Software Engineer | Mobile Architecture & Engineering Leadership

Paninggilan, Ciledug, Tangerang, 15153, Indonesia • +62 812-9182-7229 • annas.surdyanto@gmail.com

[Profile](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Software engineer turned technical leader with a track record of continuously expanding scope — from Android development in 2019, to iOS and backend engineering, to full-stack ownership of Go and Next.js/React systems since 2023. Currently lead architecture and technical direction for the mobile team at SawitPro, while independently founding, architecting, and operating JagoCatat end-to-end as solo engineer — spanning backend, frontend, infrastructure, and deployment. Comfortable leading across platforms and stacks, with hands-on depth in Kotlin, Swift, Go, and JavaScript/TypeScript, and a habit of picking up new technical domains as needed rather than staying within one specialty.

Skills

- | | |
|------------------------------------|-------|
| • Kotlin, Java | ***** |
| • Jetpack Compose | ***** |
| • Technical Leadership & Mentoring | ***** |

| • Golang | **** |
| • Odoo Implementation | *** |
| • Indonesian, English | **** |

Official Works

Digital SawitPro | Principal Software Engineer / Architect (Team Lead)

April 2026 – PRESENT, Jakarta, Indonesia

- Lead system design and technical direction for the Android platform, defining modularized architecture standards adopted across the mobile team.
- Mentor and guide mobile engineers on architecture decisions, code quality, and best practices, acting as the technical reference point for the team.
- Drive cross-functional product development decisions, partnering with product and backend teams to scope and design new features.
- Contribute to Odoo implementation (initiated December 2025) to support internal business process digitization.

Digital SawitPro | Senior Android Engineer (Team Lead)

May 2023 – March 2026, Jakarta, Indonesia

- Led mobile engineers in designing and implementing modularized Android architecture using Hilt, Room, Navigation Component, Work Manager, Kotlin Coroutine, Firebase, Maps, and Retrofit — a leadership role carried out from day one, ahead of formal promotion to Principal Software Engineer.
- Contributed to iOS development using SwiftUI, building two years of cross-platform engineering experience alongside the Android leadership role.

Vivere Group | Mobile Application Engineer (Android & iOS)

April 2021 – April 2023, South Tangerang, Indonesia

- Built end-to-end Android and iOS apps using Kotlin Multiplatform Mobile, Hilt, Jetpack Compose, SwiftUI, SQLDelight, Kotlin Coroutine, Firebase, Maps, and Ktor.

Pamulang University | Lecturer

September 2015 – 2023, South Tangerang, Indonesia

- Taught, designed, and developed content and curriculum for English subjects, while also contributing as a WordPress engineer for university web platforms.

Entrepreneurial / Founder Projects

Jago Catat (jagocatat.com) | Owner & Solo Engineer

June 2026 – PRESENT, Tangerang, Indonesia

- Founded and independently built a SaaS product end-to-end — owning product design, system architecture, backend and frontend development, and deployment.
- Built the core platform with Golang and React, integrating the Official WhatsApp Business API (WABA) to power the product's core workflows.
- Single-handedly manage the full lifecycle: product strategy, engineering, infrastructure, and deployment, with no external engineering support.

English Grammar Expert | Founder & Android Developer

May 2019 – PRESENT, Tangerang, Indonesia

- Founded and built the app architecture using Hilt, MVVM, Room, and Data Binding, with Google Play Billing integration for subscription monetization.

Quranku | Founder & Android Developer

December 2019 – PRESENT, Tangerang, Indonesia

- Founded and developed the app in Kotlin using Hilt, Room, Jetpack Compose, ExoPlayer, and YouTube IFrame integration.

Freelance / Client Work

Apex Nusantara | Full Stack Engineer (Client Project)

September 2024 – PRESENT, Tangerang, Indonesia

- Built and continue to maintain an end-to-end client website and CMS with Golang (backend) and Next.js/TypeScript (frontend), deployed via Docker and Portainer on a Linux VPS, with CI/CD set up to streamline deployment.

AI Projects

Ongoing exploration of on-device and local LLM inference, including object detection pipelines with TensorFlow Lite (MobileNet, EfficientDet, YOLOv9, published), on-device LLM integration on Android via MediaPipe GenAI (Gemma 3), server-side inference experiments with Node.js, and local model testing through Ollama and llama.cpp — reflecting a continued interest in applied AI/ML alongside core mobile and full-stack work.

Education

University of Muhammadiyah Prof. Dr. Hamka | Master's Degree, English Education

September 2012 – June 2015, Jakarta

University of Muhammadiyah Prof. Dr. Hamka | Bachelor's Degree, English Education

September 2007 – December 2011, Jakarta
